

### **John Cherry Bio**

John Cherry began his career working for his grandfather at their family business, Cherry Demolition. As a laborer and equipment operator, Mr. Cherry's knowledge and experience proved invaluable and he was soon promoted to Field Operations Manager. In 1995, John Cherry's position at the business was becoming more involved with safety. He took the OSHA 501 and OSHA 500 to start his safety career.

Mr. Cherry left the family business in 2008 to seek advancement in the safety field. He became the senior safety manager for a local project for Johnson Controls and was on the global team that reviewed and updated all safety policies and procedures. When Johnson Controls lost the local contract, Mr. Cherry moved to Honeywell as the Houston Training Manager. In this position, he taught safety classes in many disciplines that included, fall protection, rescue from heights, confined space, confined space rescue, wind energy rescue, tower climbing rescue, LOTO, behavioral based safety programs, ergonomics, and many T3 programs to name a few. He also performed site hazard assessments to better other companies safety programs, assisted in starting safety programs, and preparing sites to their VPP status.

John moved on from Honeywell in 2018 to start his own business, 3C Safety Solutions where he continues to teach a wide variety of safety classes and assisting companies with site inspections and preparing for audits.
